Operational Skills Group, LLC, (OSG) a certified small business and a Department of Defense Trading Partner, generated revenues of \$350,000 in 2004. Headquartered in Newport Beach, California with offices in Arizona and Wisconsin, OSG specializes in the delivery and integration of security force training, developing, implementing and supporting federal, state and municipal agencies' operational skills. Ed Stock, Mark Babyak and Patrick A. Rogers are Subject Matter Experts (SMEs) for evaluating the U.S. Department of State's Antiterrorism Assistance Program (ATAP), including Close Quarter Battle (CQB), Protective Operations, and Police Officer Survival. Steve Tarani is an advisor and tactical SME consultant to U.S. Transportation Security Agency (TSA), US FBI (Physical Skills Training Unit), US DEA (In-Service as well as TRI/ SIU) and Department of Homeland Security on Defensive Tactics (DT), Pacific Area Command. Serving the professional training community since 1994, OSG has completed more than eight (8) separate contractual obligations with U.S. Department of Homeland Security in the past six months.

OSG's staff of highly experienced senior-level instructors have backgrounds from DoD, DoJ, DoE and other agencies ranging from law-enforcement to military training. The majority of OSG's staff, the National Training Team (NTT), are active instructors at their respective academies and advanced operator training. They are fully mobilized working both domestic and international. The de-centralized cadre of senior-level instructors is comprised of a select group of individuals including those with Secret, Top Secret (T/S), Sensitive Compartmentalized Information (SCI), and Level 'Q' security clearances. OSG also employs several NTT Subject Matter Experts (SMEs) with strong backgrounds in counterterrorism (CT) training and related programs of instruction.

OSG members are actively involved with the development, delivery and continuous update and maintenance of ATAP programs including the U.S. Department of Energy (DOE) ATAP programs delivered at U.S. DOE Central Training Academy at Kirtland AFB in Albuquerque NM. The OSG mobile training teams provide integrated training services and work with various agencies in Europe, the Dominican Republic and other international locations.

A panel of professional SMEs who have a minimum of twenty years in each of their respective areas of expertise, with the majority specializing in CT, augment the OSG's staff. For example, one of OSG's firearms instructor has been a SWAT Team member with the Arizona Department of Public Safety for 34 years. He is also an internationally recognized authority on the subjects of Suicide Bombers, Booby Trapping, Explosives Recognition, Improvised Explosive Devices (IEDs), IED/Contraband Concealment and Convoy Security. Members of OSG have been delivering training to the professional training community since 1994.

OSG analyzes a client's specific needs and based upon that analysis, develops, implements and supports modular or custom training programs to exactly meet those needs. The professionals at OSG understand that for training to be effective it must be field-tested, easily assimilated, well organized, safe and realistic. OSG has designed, upgraded and tested Programs of Instruction (POIs) in the field for more than a decade, and then set them up like Legos® to enable each module to run standalone or seamlessly connect with any of the others. As a direct result of this seamless integration of modular instruction, trainees derive immediate and tremendous gains in skills development. Each module of instruction is designed in such a manner as to secure that delicate balance of safety and reality throughout each level of skills development. The integrated modular programs of instruction specific to law enforcement training (line officers, specialty agents, high-profile security, undercover, and overseas operations) include:

• Mechanics of Arrest	• Advanced Tactical Baton
• Intermediate Force Options	• Compliance Controls and Restraints
• Contact Weapon Defense	• Ground Control Schools
• Counter Abduction Training	• Improvised Weapons Course
• Officer Hostage Survival	• Personal Safety and Awareness
• Basic and Advanced Edged Weapons Defense	• Handgun and Long gun Retention and Counter-retention
• Basic and Advanced Small Arms (Pistol, Carbine, Sub, Shotgun, Rifle)	• Specialty US DoJ and DoD Training

OSG complies with industry standards set by US POST and DPS regulatory bodies. Such compliances include industry standard instructor/student ratios, safety protocol, program delivery protocol, outlines, hourly distributions, formatting, and supporting documentation.
